<b>Project Name</b>	Smart Fashion Recommender Application

### CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

## UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. The sidebar on the left contains the following navigation items:

- Quick start
- Namespaces (1)
- Repositories (1)
- Images (1)
- Trash (0)
- Settings

The main content area is titled "Repositories". It features a "Location" dropdown set to "Global". Below this is a search bar and a "Create" button. A table lists the repositories:

	Name	Image count	Namespace	Last updated
▼	<b>ibmproj</b> <small>icr.io/myproj/ibmproj</small>	1	myproj	4 days ago

At the bottom of the table, there is a pagination control showing "Items per page: 25" and "1-1 of 1 item".
